ATNLEBRO-TL Oral Solution

COMPOSITION : Each ml contains

Levofloxacin Hemihydrate I.P.	100 mg
Tylocin Tartrate B.P.	100 mg
Bromhexine Hydrochloride I.P.	7.5 mg

INDICATION :

- **ATNLEBRO-TL** for the prevention, control and treatment of severe respiratory infections of poultry like CRD, CCRD, E-coli infections, Salmonellosis, Fowl cholera, Coryza, Dermatitis, Enteritis.
- Tylosin for treatment of Mycoplasma infections (Chronic Respiratory Disease, infectious sinusitis).
- Bromhexine is an Expectorant and a Mucolytic agent.
- **ATNLEBRO-TL** also recommended in viral infections in Poultry, Sheep, Goat and Dairy animals.

DOSAGE & ADMINISTRATION :

Mix 1 ml. for 10-15 kg of live body weight for 3-5 days once daily in drinking water depending upon the severity of infection or as directed by the Consultant or Veterinarian.

Presentation :
500 ml & 1 litre bottle

ATNLEBRO-CL Oral Solution

COMPOSITION : Each ml contains :

Levofloxacin Hemihydrate I.P.	100 mg
Neomycin Sulphate I.P.	50 mg

INDICATION :

- **ATNLEBRO-CL** for the prevention, control and treatment of severe respiratory infections of poultry like CRD, CCRD, E-coli infections, Salmonellosis, Fowl cholera, Coryza, Dermatitis, Enteritis.
- Neomycin sulphate indicated for the prevention and treatment of bacterial enteritis in calves, sheep, goats, swine and poultry caused by bacteria susceptible to neomycin, such as E. coli, Salmonella, Campylobacter spp. & Colibacillosis.
- **ATNLEBRO-CL** also recommended in viral infections in Poultry, Sheep, Goat and Dairy animals.

DOSAGE & ADMINISTRATION :

Mix 1 ml. for 10 kgs of live body weight for 3-5 days once daily in drinking water depending upon the severity of infection or as directed by the Consultant or Veterinarian.

Presentation :
500 ml and 1 litre.

ATNLEBRO Oral Solution / Powder

COMPOSITION : Each ml contains

Levofloxacin hemihydrate I.P.	100 mg
equivalent to Levofloxacin	
Bromhexine Hcl	10 mg
Excipient	Q.S.

INDICATION : **ATNLEBRO** for the prevention, control and treatment of severe respiratory infections of poultry like CRD, CCRD, E-coli infection, Salmonellosis, Fowl cholera, Coryza, Dermatitis, Enteritis, Infectious coryza. For prevention & treatment of disease due to Gram +ve & Gram -ve bacteria, Mycoplasma in poultry, Sheep, Goat, & large animals. **ATNLEBRO** also recommended in viral infection in Poultry, Sheep, Goat, and Dairy animals. Bromhexine is an Expectorant and Mucolytic agents.

DOSAGE & ADMINISTRATION :

1 ml/ 10 kg body weight. To be administered continuously for a period of 3-5 days once daily in drinking water depending up on the severity of infection or as recommended by the veterinarian.

Presentation :
100 ml,
250 ml, 500 ml
and 1 litre, 200 gm Powder

FLOX - BH DS Oral Solution

COMPOSITION :

Each ml contains	
Enrofloxacin	200 mg
Bromhexine HCL I.P.	15 mg
Excipient	Q.S.

INDICATIONS : **FLOX - BH DS** for the control and treatment of severe respiratory infections of poultry caused by bacteria including Mycoplasmosis, Infectious coryza, Salmonellosis, Fowl cholera, Colibacillosis etc.

DOSAGE & ADMINISTRATION :

- 10.5 mg per kg body weight. (Enrofloxacin - 10 mg per kg body weight and Bromhexin - 0.5 mg per kg body weight) 1 ml of the solution to be administered for total body weight of 20.5 kg.
- To be administered continuously for a period of 3-5 days once daily in drinking water depending up on the severity of infection or as recommended by the Veterinarian

Withdrawal period :

Chicken : 28 days, Egg : 7 days.

Presentation :
500 ml &
1 litre bottle

GENTA-AB Injection

COMPOSITION : Each 2 ml contains

Gentamicin Sulphate I.P.	
Eq. to Gentamicin base	80 mg
Methyl Paraben I.P.	0.18 %
Propyl Paraben I.P.	0.02 %
(As Preservatives)	
Water for Injection	Q.S.

INDICATIONS :

For treatment of various bacterial infections of Respiratory tract, Urinary tract, Mastitis & Metritis in Buffalos, Sheep and Goats. Poultry : Early chicks mortality, BWD, CRD, Coryza etc.

DOSAGE & ADMINISTRATION :

Cattle, Sheep & Goats: 5 mg / kg body weight. By IM / IV
Poultry : 6-12 mg / kg or 1 ml / 8 - 20 kg Body weight by IM / IV

Presentation :
100 ml R.C. Vial

TYLO-AB Injection

COMPOSITION : Each ml contains

Tylosin (as tartrate) B.P.	200mg
Long acting Vehicles	Q.S.

INDICATION :

- Poultry (Respiratory problem) Sheep P.P.L.O, Bovine Pleuro Pneumonia, Foot-rot in sheep, Metritis in cattle, Secondary Bacterial infection associated with viral infection.
- Mainly used to prevent and control the diseases caused by mycoplasma in cattle, sheep, pig, goat & bird.

DOSAGE & ADMINISTRATION :

Cattle, Sheep, goat, dog :

1 ml/20 kg body wt. by I.M.

Poultry : 15-20 mg per kg of body wt. once a day, for 3-5 days or as directed by poultry consultant or Veterinarian.

Presentation :
100 ml R.C. Vial

OXY-LA AB Injection

COMPOSITION : Each ml contains

Oxytetracycline Dihydrate I.P.
Equivalent to
Oxytetracycline I.P. 200 mg
on anhydrous base in
2 Pyrrolidone vehicle system.

INDICATIONS :

- Broad spectrum antibiotic, effective in colibacillosis, anthrax, black quarter, haemorrhagic septicaemia.
- Supportive in secondary bacterial infection after viral infection.

DOSAGE AND ADMINISTRATION :

- **Cattle, Buffaloes, Sheep, Goat and pigs :** Single dose at the rate 1 ml per 10 kg body weight by intramuscular route only
- **Poultry :** 1 ml per 4 kg body weight by subcutaneous route only.

Presentation :
50ml &
100 ml R.C. Vial

KANCIN-AB Injection

COMPOSITION : Each ml contains

Amikacin Sulphate I.P.	
equivalent to amikacin	250mg
Water for injection I.P.	Q.S.
Also contains : Buffering agent :	
Sodium citrate I.P.	2.5%w/v
Preservative :	
Sodium Metabisulphate I.P.	0.66%w/v
Methyl Paraben I.P.	0.08%w/v
Propyl Paraben I.P.	0.02%w/v

INDICATIONS : Broadest spectrum among Aminoglycoside group. It is unique among Aminoglycoside because it is resistant to Aminoglycoside destroying enzyme.

KANCIN-AB is also active against many bacilli which are resistant to Gentamicin.

Poultry : to treat Mycoplasmosis, E.coli infection.

DOSAGE AND ADMINISTRATION :

Cattle, Buffaloes, Sheep & Goat : 5 to 12 mg / kg body wt. by IM, IV & SC route Also use as a IV infusion after dilution in 1:4 ratio with sterile water or as directed by veterinarian.

Poultry : Dilute 1 ml of KANCIN AB in 79 ml of normal saline & inject 0.2 ml per chicks by IM & SC route.

Adult birds 7.5 mg to 10 mg / kg body wt. by IM & SC route or as directed by poultry consultant or veterinarian.

Presentation :
100 ml R.C. Vial

KANCIN ABT Injection

COMPOSITION :

Each ml contains :
 Amikacin Sulphate I.P. 250 mg.
 eq. to Amikacin I.P.
 Tylosin Tartrate I.P. 200 mg.
 eq. to Tylosin
 Vitamin B₁₂ IP 20 mcg
 Methyl Paraben Sod. I.P. 0.18% w/v
 Propyl Paraben Sod. I.P. 0.02% w/v
 Benzyl Alcohol IP 2.00% w/v
 Propylene Glycol &
 Water for Injection IP q.s.

FEATURES :

- Synergistic action
- Broad spectrum bactericidal
- Effective against mixed infections & least toxic
- Rapid absorption & onset of action
- Well distributed in tissues

INDICATIONS :

Effective treatment of bacterial infections with good efficacy against mixed infections

DOSAGE :

1 ml per 10 – 15 kg body weight by IM or SC route or as per directed by the veterinarian.

Presentation :
100 ml

ATNOCEFT 1 gm / 4 gm Injection

COMPOSITION :

Each vial Contains :
 Sterile Ceftiofur Sodium IP
 eq. to Anhydrous Ceftiofur 1 gm / 4 gm

INDICATION :

- Mastitis
- Respiratory tract infections (Pneumonia, H.S. etc)
- Uro-genital tract infections
- Pre-operative prophylaxis and post operative treatments
- Skin and soft tissue infections
- Gastro-intestinal tract infections
- Bone and joint infections
- Bacterial septicaemia
- Animals suffering from impaired defense mechanisms

DOSAGE AND ADMINISTRATION :

Chicken (day-old chick):

0.08 to 0.2 mg/Chick, S/C only in the neck region
 (4g vial after reconstitution will treat approximately 20,000 day-old chicks).

Small animal : 5 mg/kg Body weight IM/SC once daily for 3-5 days

Presentation :
1 gm / 4 gm Vial

BANCEF-ABS 4.5 gm Injection

COMPOSITION :

Each vial contains
 Ceftriaxone Sodium I. P. 3 gm
 Equivalent to Ceftriaxone
 Sterile Sulbactam 1.5 gm
 Sodium USP equivalent to
 Anhydrous Sulbactam

INDICATION :

- Mastitis
- Respiratory tract infections
- Uro-genital tract infections
- Pre-operative prophylaxis and post operative treatments
- Skin and soft tissue infections
- Gastro-intestinal tract infections
- Bone and joint infections
- Bacterial septicaemia
- Animals suffering from impaired defence mechanisms

DOSAGE AND ADMINISTRATION :

Cattle/Bufaloes :

8-10 mg/kg body weight by IM/IV/SC route

Small animals/dogs :

20 mg/kg body weight by IM/IV route every 24 hrs for 3-5 days.
 or As per directed veterinarian.

Presentation :
4.5g Vial

BANCEF-ABTZ 4.5 gm Injection

COMPOSITION :

Each vial Contains :
 Sterile Ceftriaxone Sodium I.P. 4000 mg
 eq. to Anhydrous Ceftriaxone
 Sterile Tazobactam Sodium 500 mg
 eq. to Tazobactam

INDICATION :

- Mastitis
- Respiratory tract infections
- Uro-genital tract infections
- Pre-operative prophylaxis and post operative treatments
- Skin and soft tissue infections
- Gastro-intestinal tract infections
- Bone and joint infections
- Bacterial septicaemia
- Animals suffering from impaired defense mechanisms

DOSAGE AND ADMINISTRATION :

Cattle/Bufaloes :

8-10 mg/kg body weight by IM/IV/SC route

Small animals/dogs :

20 mg/kg body weight by IM/IV route every 24 hrs for 3-5 days.
 or As per directed veterinarian.

Presentation :
4.5g Vial

AB-VIT Injection

COMPOSITION :

Each ml contains :

Vitamin A I.P.	2000 IU
Vitamin D3 I.P.	2000 IU
Vitamin E Acetate I.P.	4 mg.
Niacinamide I.P.	10 mg.
Thiamine Hydrochloride I.P.	10 mg.
Pyridoxine HCL I.P.	5 mg.
Riboflavine Phosphate Sodium I.P.	1 mg.
D-Panthenol I.P.	1 mg.
Vitamin B12(Cyanocobalamine) I.P.	10 mcg.
D-Biotin USP	10 mcg.
Calcium Glycerophosphate I.P.	10 mg.
Appropriate Overages added	
Phenol I.P. (As preservative)	0.5%

INDICATION :

For vitamin deficiencies, to boost immunity & avoid stress

DOSAGE :

1 ml / 10-20 kg body weight S/C or I/M injection
As per directed veterinarian.

Presentation :
100 ml R.C. Vial

ATNOLIV Injection

COMPOSITION :

Each ml contains :

Thiamine Hydrochloride I.P.	10 mg
Riboflavin I.P.	3 mg
Niacinamide I.P.	100 mg
Cyanocobalamine I.P. (Vit.B12)	10 mcg
Liver Injection Crude	0.66 ml
(Having Vit. B12 activity Eq. to of Vit. B12 per ml)	2 mcg
Phenol I.P. (Preservative) 0.5%	
Appropriate overages added	
Water for Injection I.P.	Q.S.

B-Complex Liver Extract with Vitamin B12 Injection

Presentation :
100 ml R.C. Vial

INDICATION :

- For vitamin deficiencies, to boost immunity & avoid stress
- Non-specific anorexia, during convalescence, liver disorders, debility and general weakness

DOSAGE :

- For Intramuscular injection.
- Large animals 5-10 ml on alternate days.
- Small animals 0.25– 0.5 ml twice weekly.
or As per directed veterinarian.

CYPER-AB Liquid

COMPOSITION :

Each ml contains

Cypermethrin I.P.	100mg
Solvents & Emulsifiers	Q.S.

INDICTION :

- **CYPER AB** controls all ectoparasites, flying & cowering insects.
- **CYPER AB** has broad spectrum activity against pests which are resistant to other conventional insecticides.
- **CYPER AB** have long lasting residual action.
- **CYPER AB** is odorless, non-staining & non-irritant.
- **CYPER AB** is cost effective due to low dosage.

DOSAGE :

Ectoparasites control : 5-10 ml / litre of water as spray in empty shade / surrounding
or as per directed by the veterinarian.

Presentation :
15 ml, 50 ml &
1 lit BOTTLES

AB-TRAZ Liquid

COMPOSITION : Each ml contains

Amitraz I.P.	12.5% w/v
Solvents & Emulsifiers	Q.S.

INDICATION :

- Kills all kind of Ticks, Mites, Lice & Flies
- Quick action
- Reduces Production losses due to ectoparasites infestation
- No adverse effects after application on recommended dosage
- Highly safe to use

DOSAGE :

5 ml per litre of water as spray in shed or surrounding
or as per directed by the veterinarian.

Presentation :
15 ml, 50 ml &
1 lit BOTTLES

GIPRO-AB Liquid

COMPOSITION : Each 500 ml contains

Methionine Activity (Methionine Hydroxy Analogue)	127.60 gm
Choline Chloride	63.125 gm
Lysine Hydrochloride	63.125 gm
Sodium	459 mg
Phosphorus	154.16 mg
Magnesium	595.40 mg
Zinc	215.70 mg
Ferrous	223.40 mg
Copper	158.80 mg
Cobalt	206.25 mg
Manganese	384.55 mg

BENEFITS :

- Enhances egg production
- Helps in mineral deficiency
- Enhances growth and body weight
- Improves egg quality
- Blend of critical amino acid minerals with choline chloride

DOSAGE & ADMINISTRATION :

Usage through drinking water :

Broilers : 5-10 ml per 100 birds
Layers / Breeders : 10-20 ml per 100 birds

Presentation :
1 litre bottle & 5 litre

ATN-3G Powder

An ideal combination of antibiotics, vitamins & minerals with electrolyte

COMPOSITION : Each 10g contains

Neomycin Sulphate	550.6 mg	Vit B5(calcium pantothenate) I.P.	35.9 mg
Oxytetracycline Hydrochloride	550.7mg	Vit B12(mannitol Tribulate1:1000) I.P.	44.0 mcg
Vit A	11000 IU	Vit D3 I.P.	2200 IU
Vit B2(Riboflavin) I.P.	17.8 mg	Vit E Acetate I.P.	3.3 IU
Vit B3(Niacinamide) I.P.	88.1 mg	Vit K(Menadione Sodium Bisulphate)	14.1 mg

ADVANTAGES OF ATN-3G :

- **ATN-3G** used for treatment and control of colibacillosis (bacterial enteritis) caused by E-coli.
- **ATN-3G** used for chronic respiratory disease (CRD) and air sac infection caused by Mycoplasma gallisepticum.
- **ATN-3G** used for Infectious synovitis caused by Mycoplasma synoviae.
- **ATN-3G** is used for improving recovery rate during viral infections.
- **ATN-3G** improves immune response, enhance egg production in layers.
- **ATN 3G** is used to improve an environmental area and a transportation stress.
- **ATN-3G** helps in coagulation to prevent haemorrhagic conditions.

DOSAGE & ADMINISTRATION :

Usage through Drinking water.

For Poultry :-

1 gm in 2 lit for 3 to 5 days (as preventive)
1 gm in 1 lit for 3 to 5 days (for treatment)
or as per directed by the veterinarian.

Presentation :
100 gm, 500 gm sachet

VITA - AB Oral liquid Vitamin AD3, E, C

COMPOSITION : Each 5 ml of Vita - AB Contains

Vitamin A	250000 IU	Vitamin E	150 mg
Vitamin D	25000 IU	Vitamin C	500 mg

INDICATION :

- 1) In all stress causing factors such as heat, production, transport, climatic change, Handling, Vaccination, Deworming, Antibiotic therapy stress.
- 2) Vitamin deficiency, mycotoxicosis, etc.
- 3) Stunted growth, optimum calcium & phosphorous utilization.
- 4) As a performance booster.

BENEFITS :

- 1) Prevents and relieves all types of stress conditions effectively thereby, improving "Production Performance"
- 2) Improves body resistance against infections.
- 3) Improves health and immunity.
- 4) Improves growth and weight.

DOSAGE & ADMINISTRATION :

For 100 birds (Poultry)

Broilers 2-5 ml Layers 2-6 ml

For Large Animals :

20 ml / Per day for 7-10 days

For Calves, Sheep, Goat : 7-10 ml / Per day for 7-10 days

Presentation :
500 ml & 1 Litre. bottle

ATNOLIVER LIVER TONIC FORTIFIED WITH YEAST & VITAMIN

COMPOSITION : Each 10 ml contains

Liver fraction	1.25 g
(derived from 31.25g pf fresh liver)	
Yeast Extract	0.4 g
Nicotinic Acid I.P.	24 mg
Calcium Lactate	100 mg
Ferrous Gluconate	100 mg
Ferrous Chloride	40 mg
Nicotinamide	45 mg
Riboflavine	5 mg
Thiamine Hydrochloride	5 mg
Azadirachta Indica	300 mg

INDICATIONS :

- Improves appetite
- Supports liver functioning
- Enhances feed utilization & leads to higher body weight gain
- Enhances energy production to fulfil energy requirement for higher egg production

DOSAGE & ADMINISTRATION :

For 100 birds :

Broilers : 5 - 10 ml daily from 2nd to 6th week

Growers / Layers : 20 ml daily for 10 days

Cattle : 40 - 50 ml daily

Calves, Sheep, Goats and Dogs : 5 - 10 ml daily

Withdrawal Period : Nil

Presentation :
1 litre & 5 litre bottle

Corporate Office : ATN Tower, Gat No -1569 B, Swami Samarth Nagar, 10th Mail Road, Wadki, Tal. Haveli,
